

Advocating for community living as self-advocate

Senada Halilcevic

Life in institution

I have spent the biggest part of my
childhood in institutions.

I couldn't decide for myself.

The stuff decided for me.

My life in the community

I am living in the community
for three years now.

When I started living in the
community it was difficult.

At the beginning
I needed more support.

Today I have minimum support.

Right to live in the community

Many people with intellectual
disabilities still live in institutions.

Article 19 of UN Convention states that
all persons with disabilities have the
right to live in the community as all
other people.

My real life began with
the day I left the institution.

All persons with intellectual disabilities
living in institutions must also finally get
the opportunity to start living their real
life!!

Thank you!
